Every caravan manufactured by Supreme and Leader Caravans is a unique handmade product incorporating a multitude of fittings, appliances, and products from various suppliers. While our caravans may share the same designs, no two are identical in finish due to our meticulous hands-on construction process.

It is our commitment to the purchaser that at the time of handover, our caravans are free from defects. It is however important to note that due to the complex nature of the design and the conditions that caravans are subjected to whereby they experience road induced vibration, there is the expectation that minor issues may arise after initial use and ongoing adjustments are to be expected as part of regular maintenance. The wearing in process is considered normal and expected and therefore should not be a cause for concern to the purchaser when these minor adjustments are required.

It is for this reason, and to support our customers, that we have developed a thorough warranty program and cultivated an extensive service network nationwide to ensure that customers are back in their caravan as quickly and hassle free as possible.

Adhering to regular maintenance schedules is essential for addressing adjustable and perishable components, helping to ensure that the caravan allows the owner many years of uninterrupted use and enjoyment.
